

PROFILE SUMMARY

- Java Developer with 2+ years of experience designing, developing, and modernizing enterprise banking applications. Proficient in Java, Spring Boot, Spring MVC, and RESTful web services, with hands-on expertise in event-driven architectures using Apache Kafka. Strong background in backend development, database migration, and performance optimization. Experienced in on-site client engagements for public sector banks, delivering scalable, high-performance solutions aligned with business and regulatory requirements.

TECHNICAL SKILLS

- Languages:** Java, Core Java, Java 8, JavaScript, jQuery
- Frameworks & Architecture:** Spring Boot, Spring MVC, REST API, RESTful Web Services, Microservices
- Database:** SQL, Oracle, MSSQL
- ORM & Persistence:** JDBC, JPA, Hibernate
- Deployment & Servers:** Apache Tomcat
- DevOps Tools:** Jenkins, CI/CD
- Messaging & Caching:** Apache Kafka, Redis
- Tools & Technologies:** Jasper Reports, Git, GitHub, Postman
- Domain & Methodologies:** Banking Domain
- Support & Optimization:** Production Support, Performance Tuning, Query Optimization

KEY ACHIEVEMENTS

- Successfully upgraded the eTHIC banking application for ESAF Bank, enhancing system performance, scalability, and security compliance.
- Developed and deployed RESTful APIs using Spring Boot, enabling seamless integration with internal banking systems and improving interoperability and response times.
- Implemented event-driven architecture using Apache Kafka for real-time data processing and reliable communication between microservices.
- Utilized Redis for caching and performance optimization, significantly reducing latency and improving application throughput.
- Designed and generated Jasper Reports for audit and compliance, supporting regulatory and operational reporting requirements.
- Played a key role in production support and on-site client implementation, ensuring smooth deployments and rapid resolution of critical issues.

WORK EXPERIENCE

Software Developer | NCS Softsolution Pvt Ltd | Feb 2025 – Till Now

- Developed and enhanced enterprise banking applications using **Java, Spring Boot, and microservices architecture**
- Designed and implemented **RESTful APIs** for seamless integration with internal banking systems
- Integrated **Apache Kafka** for event-driven communication and real-time data processing
- Utilized **Redis** for caching and performance optimization in high-traffic modules
- Migrated and optimized databases using **Oracle** and **Microsoft SQL Server (MSSQL)**
- Created **Jasper Reports** to support audit and compliance requirements
- Improved application performance through **SQL tuning and backend optimizations**
- Supported **deployment, on-site implementation, and production issue resolution**

PROJECTS UNDERTAKEN

eTHIC Application Upgrade – ESAF Bank (Kerala)

- Upgraded application architecture to improve performance, scalability, and security compliance.
- Developed RESTful services and Jasper Reports for compliance modules, ensuring seamless data flow and regulatory reporting.
- Implemented event-driven communication using Apache Kafka, enabling reliable and scalable data processing across systems.
- Supported deployment and post-production stabilization, ensuring smooth releases and quick resolution of production issues.

eTHIC Application Upgrade – Jalgaon People Co-operative Bank (Mumbai)

- Developed 3 major modules of RIBA, Concurrent Audit and Management Audit Modules. Successfully Deployed in Production.
- Enhanced backend services and reporting modules, improving system performance and maintainability.
- Implemented event-driven data pipelines using Apache Kafka to enable real-time data synchronization and reliable inter-service communication.
- Provided deployment support and conducted user training sessions, ensuring smooth adoption and operational readiness.

EDUCATION

Master of Computer Application	
Dr MGR Educational and Research Institute	2022 - 2024
